Objects of study in a digital world

Tuesday 4 February 2020

With:
Prof Christine Hine,
University of Surrey, UK

When/where:
Tuesday 4 February
10.00am - 1.00pm
Larry Saha Room
Haydon Allen Building, ANU

Submissions:
Due by 30 November 2019
Applicants will be advised of the outcome within the same week.

On the occasion of her visit at the ANU, Professor Christine Hine, one of the pioneers of online ethnography, will lead a master class on the topic “objects of study in a digital world”.

This half-day class will give participants an opportunity to discuss how theoretical inclinations and practical constraints lead them to carve out objects of study from the many alternatives available in an interconnected digital world. More specifically, the masterclass will address how to work creatively with the various forms of online and offline data that are available to us to construct interesting research objects.

HDR students in CASS and CAP are invited to submit applications to participate in the class. Places are limited. To apply, simply send a 200-word Expression of Interest describing why you would benefit from the class, and your CV, to both of the following addresses:

april.biccum@anu.edu.au
baptiste.brossard@anu.edu.au

Deadline for submissions is Saturday, November 30. Applicants will be advised of the outcome within the same week.

Applicants who are invited to participate will be asked to prepare for the masterclass with a summary of their research project, addressing how their research object is defined in relation to their data.

This is a great opportunity for HDR students at the ANU to be in conversation both with like-minded peers from across the campus and with an exemplary researcher. We do hope to see you there!
